

# Goodwin's Mills Fire-Rescue

Created Date 12-15-08

Effective Date 12-15-08

12-15-08 Carpenter, H.

## GENERAL ORDER 08-436

**Subject:**

Update to SOG 2201 - Response to Carbon Monoxide Incidents

**Remarks:**

Please see attached updated SOG # 2201.

The following change has been made

the response level has been changed from Engine 2 and Ladder 2, to 1 Engine, 1 Ladder and 1 Ambulance.

The ambulance has been added to the run card for the following purposes

1. Give the occupants a place of refuge while the building is evaluated
2. Allow quicker access to transport of effected patients.

This does not mean that all occupants of a residence with a CO detector sounding are patients. An occupant will be considered a patient once they have complained of symptoms that reflect those of CO poisoning or they request to be medically evaluated.

No member shall enter a potential CO environment without proper PPE, nor shall any patient be evaluated inside of such a building.
